

CM Plex® capsules

90 softgel capsules (65g)
Item no.: 18514

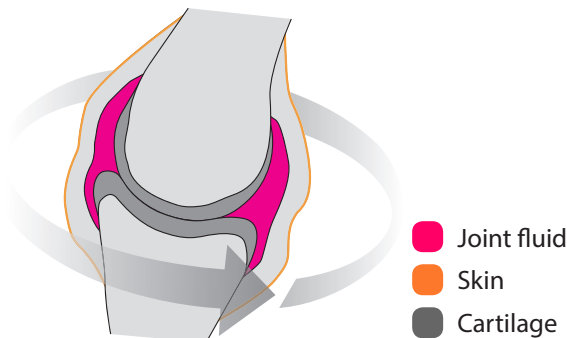

Active & mobile

The human skeletal system consists of many different parts: bones, joints, ligaments, cartilage, muscles, tendons, etc. There are 200 individual bones that are connected by joints which allow your rigid skeleton to move. The joint surface is covered by cartilage to protect the bones from friction.

Most of your joints are 'synovial joints'. They are movable joints containing a lubricating liquid called synovial fluid. Synovial joints are predominant in your limbs where mobility is important. Ligaments help provide their stability and muscles contract to produce movement.

- ✓ CM Plex® capsules contain a blend of cetyl esters and natural oils (such as salmon and soy oil) which is believed to provide joints with essential nutrients
- ✓ Cetyl esters such as Cetyl Myristoleate have been reported to have joint-lubricating and anti-inflammatory qualities, decreasing the morning stiffness and pain in joints markedly
- ✓ Salmon oil is a source of Omega 3 fatty acids (DHA and EPA) which are believed to contribute to the normal function of the heart
- ✓ Soy oil contains alpha-linolenic acid, which is believed to contribute to the maintenance of normal blood cholesterol concentrations

Example of a synovial joint

Recommended use:

Take 1 – 2 CM Plex® capsules with water 3 times daily at meal times.

Zutaten: Ingredients: Cetyl myristate, cetyl myristoleate, cetyl palmitoleate, cetyl laurate, soy oil, salmon oil, gelatin, glycerin and locust bean gum.

Most important nutrients:

Cetyl myristoleate
Cetyl myristate
Cetyl palmitoleate
Cetyl oleate
Cetyl laurate
Salmon oil
Soy oil
